JB 12

Hi Chris

Here are my thoughts on the 2 concepts - I would be happy with either design so couldn't really rank them.

Concept 1

Pros - more rooms for use and good sized rooms

- attractive viewing platform

Cons - could we actually utilise all this space?

- bigger footprint so loss of parking space

- users of viewing platform would have to go inside the building so it wouldn't benefit playground users caught in a shower!

- wasted space between original building and new building

Concept 2

Pros - seemingly smaller footprint

- sheltered area could be used without access to the hall itself

cons - the internal spaces are awkward shapes so could be difficult to use

- upstairs kitchen is too far from the hall space to be practical.

I think this project could be very valuable in enhancing the use of both the existing hall and the playground (which is already very popular). The parish needs a focal point to bring the community together more so I support taking it forward to the next stage in the process.

I would be very happy to volunteer in the cafe, and in a shop, should it become feasible in the future.

Good luck!
